APPLY FOR A SWIFT! ACCOUNT

SWIFT! is a system that is connected to existing court data. This data is used to populate fields on the sentencing guidelines form. In the future, this connection will allow sentencing guidelines preparers to electronically share copies of guidelines with one another and to submit the final guidelines to the sentencing courts. Even then, the system can generate paper copies for jurisdictions that require paper.

Existing technology will still allow preparers to modify the worksheets up until the court accepts the electronic copy.

The system will calculate the guidelines recommendations and populate the coversheet every time the final scores are modified.

In the future, the system will assist users in preparing the sentencing guidelines as it checks for common errors on the worksheets. In all cases, the preparer will make the final call on how a factor is scored. This is the beginning of the automation process.

SWIFT! is the only way to complete sentencing guidelines and to print paper copies of the worksheets.
